

# KS2 Maths: Chance and Probability

[Answers to this test can be found on the separate answers sheet]

1. If you toss a coin what is the chance of getting a head?
2. You have a bag of coloured beads. There are 3 red beads, 4 blue beads, and 5 green beads. If you pick a bead out at random, what is the probability of picking a red bead?
3. If you roll a dice, what is the probability that you will get a 6?
4. When rolling a dice, what is the probability that you will get a 4?
5. If you roll a dice, what is the probability that you will get an even number?
